AGENCIES APPROPRIATIONS ACT, 2015**

Report language included in House Report 113-448 (“the House report”) or Senate Report 113-181 (“the Senate report”) that is not changed by this explanatory statement or this Act is approved. The explanatory statement, while repeating some language for emphasis, is not intended to negate the language referred to above unless expressly provided herein. In cases where both the House report and the Senate report address a particular issue not specifically addressed in the explanatory statement, the House report and the Senate report should be read as consistent and are to be interpreted accordingly. In cases where the House report or the Senate report directs the submission of a report, such report is to be submitted to both the House and Senate Committees on Appropriations (“the Committees”).

Each department and agency funded in this Act shall follow the directions set forth in this Act and the accompanying statement, and shall not reallocate resources or reorganize activities except as provided herein. Reprogramming procedures shall apply to: funds provided in this Act; unobligated balances from previous appropriations Acts that are available for obligation or expenditure in fiscal year 2015; and non-appropriated resources such as fee collections that are used to meet program requirements in fiscal year 2015. These procedures are specified in section 505 of this Act.

Any reprogramming request shall include any out-year budgetary impacts and a separate accounting of program or mission impacts on estimated carryover funds. Any program, project or activity cited in this statement, or in the House report or the Senate report and not changed by this Act or statement, shall be construed as the position of the Congress and shall not be subject to reductions or reprogramming without prior approval of the Committees. Further, any department or agency funded in this Act that plans a reduction-in-force shall notify the Committees by letter no later than 30 days in advance of the date of any such planned personnel action.

When a department or agency submits a reprogramming or transfer request to the Committees and does not receive identical responses, it shall be the responsibility of the department or agency seeking the reprogramming to reconcile the differences between the two bodies before proceeding. If reconciliation is not possible, the items in disagreement in the

reprogramming or transfer request shall be considered unapproved. Departments and agencies shall not submit reprogramming notifications after July 1, 2015, except in extraordinary circumstances. Any such notification shall include a description of the extraordinary circumstances.

In compliance with section 535 of this Act, the Departments of Commerce and Justice, the National Aeronautics and Space Administration and the National Science Foundation shall submit spending plans, signed by the respective department or agency head, for the Committees' review not later than 45 days after enactment of this Act.

INSERT 250

Community-based sexual assault response reform.—The agreement includes \$41,000,000 for a competitive grant program to support multi-disciplinary community response teams tasked with a comprehensive approach to sexual assault cases. The goal of this grant program is to address the growing backlog of sexual assault kits at law enforcement agencies. The Department, through the National Institute of Justice, shall develop a comprehensive model to address the underlying issues that led to the backlogs. The Department shall ensure that grant award decisions shall be informed by this model, and shall support efforts that include planning, implementation, and long-term evaluation. Grant funding may be used to inventory the existing backlog of rape kits, test backlogged kits, develop “cold case” units to pursue new investigative leads and to support victims throughout the investigation and prosecution process. Grants may also be used to develop evidence-tracking systems, train law enforcement on sexual assault investigations, and conduct research on outcomes in sexual assault cases. (NIJ)

This effort shall complement and not duplicate other forensic grant programs at the Department that test DNA evidence kits in crime labs. These grants shall not supplant other sources of funding for these activities.

The National Institute of Justice is directed to brief the Committees on Appropriations on the program not less than 45 days after the enactment of this Act, including design and evaluation criteria for the program, ideal grant size and the number of jurisdictions where this intervention is needed.

Procurement, Acquisition and Construction account. The agreement for this account only supports NASA's requested funding related to these two missions.

The agreement does not include direction in the House report regarding the Total Solar Irradiance Sensor 2 (TSIS-2). Within funding for Other Missions and Data Analysis, the agreement includes funding to proceed with studies in fiscal year 2015 related to the development of TSIS-2.

The agreement supports Senate direction on Landsat Data Continuity, but provides the requested amount of \$64,100,000 and clarifies Senate direction on development parameters. Instead of a firm cost cap boundary, the mission shall: cost substantially less than Landsat-8; provide the same data quality as Landsat-8 so as to not require an overhaul of associated ground systems; and provide no degradation or gap in data including the 8-day continuous terrestrial coverage. The agreement does not endorse any efforts to develop alternative approaches to this data acquisition that would increase risk of a coverage gap and not meet the needs of the Landsat user community.

Planetary Science.—In lieu of any amounts included for specific Planetary Science activities in the House and Senate reports, the agreement provides \$255,800,000 for Planetary Science Research, including \$165,400,000 for Research and Analysis and \$40,000,000 for Near Earth Object Observations; \$255,000,000 for Discovery, including not less than \$25,000,000 for Future Discovery Missions; \$286,000,000 for New Frontiers, including not less than \$5,000,000 for Future New Frontiers Missions and \$224,800,000 for OSIRIS-Rex; \$305,000,000 for Mars Exploration, including not less than \$100,000,000 for a Mars 2020 Rover that meets scientific objectives laid out in the most recent Planetary Science decadal survey; \$181,000,000 for Outer Planets, including not less than \$100,000,000 for a Jupiter Europa mission as described in the House report; and \$155,000,000 for Technology, including \$18,000,000 for technologies for the study and characterization of the surface and subsurface of Europa as described in the House report. NASA shall follow direction from the House and Senate reports regarding the Europa Mission and its potential launch vehicle. Funding provided is for the planning of a mission in line with the Planetary Science decadal survey, including an evaluation of SLS as the baseline launch vehicle.

the Space Launch System

Astrophysics.—Within the amount provided for Astrophysics, NASA shall comply with direction from the Senate report regarding the Hubble Space Telescope and the Balloon Project. The agreement includes \$70,000,000 for the Stratospheric Observatory for Infrared Astronomy (SOFIA) to maintain core operations. NASA shall continue to seek partners to restore SOFIA to its full operational level, as described in the House report. The agreement reiterates direction in the Senate report that any science mission terminations should be made only after a senior review that evaluates the relative scientific benefit and return on investment. In addition, within the amount for Cosmic Origins, the agreement includes \$50,000,000 for the Wide-Field Infrared Survey Telescope (WFIRST) as described in the Senate report.
